ABOUT US

Direct Fuels to Produce Biodiesel at North Texas Facility: Company is One of Only Two Producers of the Alternative Fuel in DFW.

Direct Fuels is the largest independent regional fuel distributor and specialty processor in North Texas. The company operates an onsite fuel processing facility which recycles transportation mixture (transmix) back into various types and grades of usable fuel. The company sells its petroleum products across its own truck rack in Euless.

Direct Fuels sells its fuel products primarily to:

- unbranded fuel retailers; and
- distributors that supply commercial accounts

Established in 1997, Direct Fuels today generates annual revenue in excess of \$240 million.
